Pressure transmitter with flameproof enclosure
For applications in explosion-protected areas
Models E-10 and E-11

Applications
- Borehole monitoring
- Refineries and petrochemical industry
- Drilling platforms and pipelines
- Gas compressors

Special features
- CSA and FM approved as “explosionproof” for class I, div. 1 hazardous areas
- ATEX and IECEx approved as “flameproof enclosure” for II 2G Ex db IIC T6...T1 Gb
- Current or voltage output
- Designed for harsh ambient conditions
- Low-power version available as an option

Description
The model E-10 and E-11 flameproof pressure transmitters have been designed specifically for the high demands of industrial oil and gas applications.

These pressure transmitters can be delivered with various analogue signals from 4 ... 20 mA to a low-power version with DC 1 ... 5 V. They feature an exceptionally high resistance to vibration, pressure spikes and moisture ingress. Furthermore, these pressure transmitters fulfil IP67 (NEMA 4x) ingress protection.

On each individual instrument a comprehensive quality control and calibration is performed, so that an accuracy of ≤ 0.5 % can be ensured. Temperature compensation guarantees accuracy and long-term stability, even with strong fluctuations in the ambient temperature.

The models E-10 and E-11 are suitable for sour gas applications and feature particularly high resistance against sulphide stress cracking when in contact with sulphurous gases.

The pressure transmitters are approved as “explosionproof” for class I, II, III, div. 1 hazardous areas to FM and CSA as well as “flameproof” for II 2G Ex db IIC T6...T1 Gb to ATEX and IECEx.
# Measuring ranges

<tr>
<td></td>
<td>DC 0 ... 10 V</td>
</tr>
</tbody>
</table>

**Load in Ω**
- 4 ... 20 mA: \( \frac{\text{power supply} - 10 \text{ V}}{0.02 \text{ A}} \)
- DC 0 ... 5 V: > maximum output signal / 1 mA
- DC 0.5 ... 4.5 V: > 100k
- DC 1 ... 5 V: > 100k
- DC 0 ... 10 V: > maximum output signal / 1 mA

Voltage supply

**Power supply**
The power supply depends on the selected output signal.
- 4 ... 20 mA: DC 10 ... 30 V
- DC 0 ... 5 V: DC 10 ... 30 V
- DC 0.5 ... 4.5 V: DC 5 ... 30 V
- DC 1 ... 5 V: DC 6 ... 30 V
- DC 0 ... 10 V: DC 14 ... 30 V

**Max. power consumption**
1 W

Accuracy specifications

**Accuracy at reference conditions**
0.5 % of span

Including non-linearity, hysteresis, zero offset and end value deviation (corresponds to measured error per IEC 61298-2).

**Non-linearity (per IEC 61298-2)**
\( \leq 0.2 \% \text{ of span} \) (BFSL)

**Non-repeatability**
\( \leq 0.1 \% \text{ of span} \)

**Temperature error in range 0 ... 80 °C [32 ... 176 °F]**
- Mean temperature coefficient of zero point:
  \( \leq 0.2 \% \text{ of span/10 K} \)
- Mean temperature coefficient of span:
  \( \leq 0.2 \% \text{ of span/10 K} \)

**Settling time**
\( \leq 2 \text{ ms} \)
\( \leq 10 \text{ ms} \) (at medium temperature < -30 °C [-22 °F] and measuring range \( \leq 0 ... 25 \text{ bar} \); for model E-11)

**Long-term stability**
\( \leq 0.2 \% \text{ of span/year} \)

For the use in hydrogen applications, please observe technical information IN 00.40 on www.wika.com regarding long-term stability.

Reference conditions (per IEC 61298-1)

**Temperature**
15 ... 25 °C [59 ... 77 °F]

**Atmospheric pressure**
860 ... 1,060 mbar

**Humidity**
45 ... 75 % r. h.

**Power supply**
DC 24 V

**Mounting position**
Calibrated in vertical mounting position with process connection facing downwards.
Operating conditions

Ingress protection (per IEC 60529)
IP67 (NEMA 4x)

Vibration resistance (per IEC 60068-2-6)
20 g
10 g (for variant ½ NPT male conduit, with potted cable outlet)

Shock resistance (per IEC 60068-2-27)
1,000 g (mechanical shock)
100 g (for variant ½ NPT male conduit, with potted cable outlet)

Permissible temperature ranges

■ for instruments per ATEX and IECEx
Ambient and medium:
T6: -40 ... +60 °C  T6: -40 ... +140 °F
T5: -40 ... +75 °C  T5: -40 ... +167 °F
T4: -40 ... +102 °C  T4: -40 ... +215 °F
Storage:
-40 ... +102 °C  -40 ... +215 °F

-40 °C [-40 °F] only valid when no sealing is used.
Sealings from NBR only admissible to -30 °C [-22 °F].
Sealings from FPM/FKM only admissible to -15 °C [5 °F].

■ for instruments per FM, CSA
Ambient and medium:
T6: -40 ... +60 °C  T6: -40 ... +140 °F
T4: -40 ... +105 °C  T4: -40 ... +221 °F
Storage:
-40 ... +105 °C  -40 ... +221 °F

-40 °C [-40 °F] only valid when no sealing is used.
Sealings from NBR only admissible to -30 °C [-22 °F].
Sealings from FPM/FKM only admissible to -15 °C [5 °F].

T = ambient and medium temperature
Materials

Wetted parts
- Stainless steel (additionally Elgiloy® for model E-10 with measuring range > 0 ... 25 bar, NACE-compliant)
- For sealing materials see “Process connections” Where the medium is hydrogen, contact the manufacturer.

Non-wetted parts
Case from stainless steel
For cable see “Electrical connections”

Internal pressure transmission medium
Synthetic oil (no pressure transmission medium for model E-10 with measuring range > 0 ... 25 bar)

For other materials see WIKA diaphragm seal programme
